

# CitySec Meetups

CitySec is an unaffiliated collection of informal meetups for like-minded security professionals.

CitySec groups meet to discuss topics of interest in a non-work, non-vendor setting; preferably while drinking.

CitySec meetups are like any other professional society meeting, except:

- There's no professional society
- There's no membership
- There's no dues
- There's no cover charge
- There's no corporate sponsorship
- There's no vendor pitches
- There's no requirement to RSVP
- There's no fixed agenda
- They're publicly announced and open to all

## No Meetup Near You?

If there are no current meetups in your area but you know of interested parties, organize a beta meetup. Invite the people you already know (and ask them to invite interested friends & coworkers) to a public location that (preferably) offers food, drinks, and wifi. If it goes well and you decide to continue running meetups, create a website, mailing list, and/or Twitter account to announce meeting reminders, then submit the information to this list.
